

4.54 Billion YA – Formation of the Earth – Dalymple2001  
4.4 BYA – Earliest Water  
4.28 BYA – Earliest life thermophilic organisms and the hydrothermal vent  
2.3 BYA – The oldest geological and chemical evidence of the first organisms that developed oxygenic photosynthesis (anoxygenic ancestors of cyanobacteria) – declerc2012  
2.1 BYA – The Great Oxygenation Event (GOE)  
1 BYA – Evidence of earliest non-marine eukaryotes – strother2011  
850 MYA – Land plants evolve from algae – knauth2009,  
530 MYA – Oldest fossil footprint on land, lobster sized centipede like animal  
523 MYA – Oldest Ancestor to vertebrates – Pikaia  
450-440 MYA – the Ordovician–Silurian extinction that killed off 27% of all families, 57% of all genera and 60% to 70% of all species.  
420-350 MYA – Prototaxites – prototaxites-a-400-myr...2002  
412 MYA – Oldest Insect Discovered – Rhyniognatha  
375 – 360 MYA – Late Devonian Extinction eliminated about 19% of all families, 50% of all genera and at least 70% of all species.  
365 MYA – Oldest animal to have feet rather than fins – Ventastega  
350 MYA – Oldest Reptile – Westlothiana  
290 MYA – Frogamander – Gerobatrachus  
252 MYA – “The Great Dying” Permian – Triassic Extinction killed 57% of all families, 83% of all genera and 90% to 96% of all species (53% of marine families, 84% of marine genera, about 96% of all marine species and an estimated 70% of land species,  
228 MYA – Eo Raptor (Dinosaur)  
213 MYA – Oldest True Frog – Vieraella  
201 MYA – Triassic – Jurassic Extinction Event. About 23% of all families, 48% of all genera (20% of marine families and 55% of marine genera) and 70% to 75% of all species became extinct  
165 MYA – Oldest Placental Mammal – Eutherian  
130 MYA – Oldest Flower – Montsecchia vidalii  
66 – MYA – Cretaceous – Paleogene Extinction. 17% of all families, 50% of all genera and 75% of all species became extinct. In the seas all the ammonites, plesiosaurs and mosasaurs disappeared and the percentage of sessile animals (those unable to move about) was reduced to about 33%.  
92.5 MYA – Oldest Flying bird –  
92 MYA – Oldest Bee – Mellitosphex  
80 MYA – Oldest Ant – Sphecomyrma  
38 MYA – Oldest Primitive Monkey – Apidium

10,000BC Walled City of Jericho and the Culture of War in the ancient Hebrew Bible  
4000BC in Mesopotamia each Sumerian city-state was headed by a leader who was called lugal, 'big man', or ensi, 'prince-priest'. He was appointed by the god to rule the city and was supposed to live in his temple. Texts describe royalty as power coming from the gods, a tradition passed on to the Semites as it was again in Babylon and Assyria, where the kings' names had similar meanings. They derived their power from their environment and corruption. An extensive vocabulary referring to divine light and divine splendour was used to describe their attributes. Since the king was responsible for building temples, organizing offerings to the gods, worship, sacrifices and feasts, functionaries gradually replace him and various duties were delegated to priests.”  
3000BC “From the beginning of the third millennium BC we find the same form of government from India to the Atlantic both among nomadic peoples and ethnic groups settled in one place: they had at their head a leader who was acknowledged to have divine powers. Historians call this sacred kingship ...”  
3000BC the Namer Palette, in which the king is shown holding a mace and striking an enemy whom he holds by the hair. Also shown are stylized figures of enemies decapitated with their heads put between their legs.  
3000-1700BC papyrus from ancient Egypt, these include accounts of victorious military expeditions, and they seem intended to glorify the generals and pharaohs involved.  
2900BC The Stela of vultures is a bas-relief of the victory of the ruler of Lagash in the twenty-ninth century BC  
2685BC “Standard of UR”, shows elaborate scenes on its two sides, one of peace (a banquet scene) and one of war, including four-wheeled chariots transporting spearmen in armor, soldiers carrying axes, and prisoners of war being presented to the king.  
2254-2218BC The “Victory stela” of Narma Sin (2254-2218 BC), shows the king standing upon his vanquished enemies.  
2200 & 1100BC (sixth and twentieth dynasty) insurrection of the masses, “both had their origin in the failure of the ruling classes to permit the masses to have sufficient food and both were accompanied by disorder, murder, and robbery” Moret and Turner  
1754BC The Code of Hammurabi  
1600BC “The Shang dynasty ruled a slave-owning state. As the largest slave owner, the Shang king was always launching wars upon other tribes in order to seize as many captives as possible. By their owners' tools and property, slaves had to engage in all sorts of productive and domestic work and, moreover, they were often given awards and gifts, and even sacrificed as human victims to be buried with their dead owner or offered to gods and spirits in religious ceremonies. In the royal burial area of the Yin ruins, numerous sacrificial pits arranged regularly have been uncovered, each containing about a dozen or so of the remains of human victims in successive memorial ceremonies to the departed Shang kings. According to statistical data, the Yin ruins have yielded human victims totaling over 2,300 ... such large-scale slaughter reflects the slave-owning nature of Shang society.  
1400BC Rigveda composed orally, “The despicable enemies who dare deny Indra's supremacy are referred to as dasa or dasya. They have a black complexion, flat noses and are indifferent to the gods. They do not perform the Aryan sacrifices and probably worship the phallus. But they are wealthy with great stores of gold and live in fortified strongholds.” According to other verses slavery was practiced  
1340BC The treasures of Tutankhamun, include remarkable painted scenes that glorify the king as warrior and hunter. On one side of a painted chest the king is shown on his horse-drawn chariot, much larger than any other figure, shooting arrows at enemies who litter the ground in disorder. On the other side a similar design shows the king shooting at wild animals that are wounded and dying  
1304-1278BC One of the battles during the reign of the pharaoh Ramses is recorded in scenes on temples erected at the time as well as in several papyrus manuscripts, the manuscripts describe not only details of the military campaign, but also the importance of spies, military reconnaissance and a peace treaty at the end  
1237-1226BC The victory stela of Merneptah made commemorate his victory over the Libyan and ProtoHellenic invaders, whom they called the ‘sea people’. On the same stela is also commemorated the Egyptian invasion and destruction of Israel, including the lines, ‘Israel is laid waste, its seed exists no more’.”  
1027-771BC the Western Zhou Dynasty “... At the bottom of society were slaves who had lost their personal liberty.” ... “Some new religious ideas, for instance, the concept of the Supreme God (Shang-Ti), came into existence. The Supreme God was believed to be the sovereign dominating all other gods, and it was said that he granted the kings the mandate of heaven to the kings and entrusted them with the power of ruling the world. Such use of religious ideas for maintaining the dynasty's domination was a new development.” ... Important manuscripts have been preserved from the Western Zhou Dynasty, including the I Jing (divination manual), the Shi Jing (Book of Odes) and the Shu Jing (Book of Documents). The latter includes many documents relating to warfare, such as “the speech at the battle of Gan.” “The punitive expedition of Yin”, “the successful completion of the war on Shang”,  
900BC “... In Mesopotamia the bas-relief in the palace of Nimrud, Ashurnasipal (ninth century BC) is shown laying siege to a city.  
Two centuries later, and using the same technique Ashurbanipal appears in a hunting scene at his palace in Ninevah.”  
668-627BC Ashurbanipal extensive library, over 20,000 cuneiform tablets, “The art of master Adapa I learned - the hidden treasure of all scribal knowledge ... I mounted my horse ... I held the bow. I shot the arrow, the sign of my valor. I threw unwieldy azmaru-spears like arrows. Holding the

1724-1804 – Immanuel Can't “Enlightenment is man's emergence from his self-incurred immaturity”, “Dare to be wise!”  
in re: to Kant Johann Herder (1744-1803) argued that human creativity, which necessarily takes unpredictable and highly diverse forms, is as important as human rationality  
1800 Adolf Bastian argued for “the psychic unity of mankind” He proposed that a scientific comparison of all human societies would reveal distinct worldviews consisted of the same basic elements. According to Bastian all human societies share a set of “elementary ideas”, different cultures, or different “folk ideas” are local modifications of the elementary ideas  
“Compared to Bronfenbrenner Universal, and my model comp which identifies these “elementary ideas ...[in] the minds of all people operate in the same way”  
Matthew Arnold (1822-1888) used the word “culture” to refer to an ideal of individual human refinement, of “the best that has been thought and said in the world.” This concept of culture is also comparable to the German concept of *bildung*: “...culture being a pursuit of our total perfection by means of getting to know, on all the matters which most concern us, the best which has been thought and said in the world.” (Arnold, Matthew. *Culture and Anarchy*.  
(Williams (1983), p. 90. Cited in Shuker, Roy (1994). Understanding Popular Music, p. 5. ISBN 0-415-10723-7, argues that contemporary definitions of culture fall into three possibilities or mixture of the following three: “a general process of intellectual, spiritual, and aesthetic development”, “a particular way of life, whether of a people, period, or a group”, “the works and practices of intellectual and especially artistic activity.”)

reins like a driver I made the wheels go round. I learned to handle the ardu and heavy kababu shields like a fully-equipped Bowman.”  
515BC The Behistun Inscription (c. 515 BC) detailing the rise of Darius I to the Persian throne, can be seen as an early example of propaganda.  
551-479BC (Confucius)  
544-496 BC Zou Tzu, The Art of War, “The art of war is of vital importance to the State. It is a matter of life and death, a road either to safety or to ruin. Hence it is a subject of inquiry which can on no account be neglected. The art of war, then, is governed by five constant factors, to be taken into account in one's deliberations, when seeking to determine the conditions obtaining in the field. These are: (1) The Moral Law; (2) Heaven; (3) Earth; (4) The Commander; (5) Method and discipline... The Moral Law causes the people to be in complete accord with their ruler, so that they will follow him regardless of their lives, undismayed by any danger... Heaven signifies night and day, cold and heat, times and seasons... Earth comprises distances, great and small; danger and security; open ground and narrow passes; the chances of life and death... The Commander stands for the virtues of wisdom, sincerity, benevolence, courage and strictness... By method and discipline are to be understood the marshaling of the army in its proper subdivisions, the graduations of rank among the officers, the maintenance of roads by which supplies may reach the army, and the control of military expenditure.” “All warfare is based on deception... Hence, when able to attack, we must seem unable; when using our forces, we must seem inactive; when we are near, we must make the enemy believe we are far away; when far away, we must make him believe we are near... Hold out baits to entice the enemy. Feign disorder, and crush him... If he is secure at all points, be prepared for him. If he is in superior strength, evade him... If your opponent is of choleric temper, seek to irritate him. Pretend to be weak, that he may grow arrogant... If he is taking his ease, give him no rest. If his forces are united, separate them... Attack him where he is unprepared, appear where you are not expected... These military devices, leading to victory, must not be divulged beforehand.”  
539BC The Cyrus Cylinder  
450BC The Gortyn Laws that have been preserved as stone inscriptions in Crete make reference to rights of marriage and property: “Xl. If a slave going to a free woman shall wed her, the children shall be free; but if the free woman to a slave, the children shall be slaves; and if from the same mother free and slave children be born, if the mother die and there be property, the free children shall have it; otherwise her free relatives shall succeed to it.”  
800-400BC The Axial Age, The relation of religions to the state is very contradictory when seen in historical perspective. While state religions were being used to support the state's culture of war, other religions arose in opposition to the state's culture of war. Their prophets spoke of non-violence and brotherhood instead of violence and enemy images, and they gave rise to the great religions of later history. In the period around 800-400 BC, called the “Axial Age” by the philosopher Karl Jaspers (1953), Confucius taught in China, the Siddhartha Gautama (Buddha) taught in India, Zoroastrianism arose in Persia and Jainism in India, the Upanishads were written in India, Elijah, Isaiah and Jeremiah prophesied in Israel, foreshadowing the life and teachings of Jesus and Mohandas Gandhi in the last century  
460-370BC Hippocratic Corpus  
450BC – The Twelve Tables  
350-283BC The Arthashastra written by Chanakya (c. 350 283 BC), a professor of political science at Takshashila University and a prime minister of the Maurya Empire, discusses propaganda in detail, such as how to spread propaganda and how to apply it in warfare. His student Chandragupta Maurya (c. 340 – 293 BC), founder of the Maurya Empire, employed these methods during his rise to power.  
300BC Stoicism  
268-232BC Edicts of Ashoka, The emperor Ashoka renounced his earlier military exploits and adopted the non-violence of the Buddhist religion for his kingdom.  
200BC A quarter of a million slaves rose in revolt in Sicily, they were starved into submission and thousands of them were crucified  
73BC Spartacus led slave revolt in Italy, 6,000 of his followers were crucified along the Appian Way  
40BC Organon, arrangement of the works of Aristotle made by andronicus of Rhodes  
59BC – 17AD The writings of Romans such as Livy (c. 59 BC 17 AD) are considered masterpieces of pro Roman propaganda.”  
17AD Nero's urban prefect murdered by one of his slaves, every slave - the entire household of 400 slaves - under the same roof at the time of such a murder was to be put to death as a deterrent  
129-200AD – Galen, On the Temperaments  
300-500AD Samaritan Decalogues: “Oldest -known carving of [The Ten Commandments] the moral code shared by Judaism, Christianity and Islam alike”: 1. Thou shalt have no other gods 2. Thou shalt not make unto thee any graven image 3. Thou shalt not take the name of the Lord god in vain 4. Remember the Sabbath-day to keep it holy 5. Honor thy father and thy mother 6. Thou shalt not kill 7. Thou shalt not commit adultery 8. Thou shalt not steal 9. Thou shalt not bear false witness against thy neighbor 10. Thou shalt not covet thy neighbors house, wife, slaves, animals or anything else  
300AD the following excerpt from a poem by Fu Xuan in the Third Century BC: “How sad it is to be a woman! Nothing on earth is held so cheap. Boys stand leaning at the door Like Gods fallen out of Heaven. Their hearts bear the Four Occams. The wind and dust of a thousand miles. No one is glad when a girl is born. By her the family sets no store. When she grows up, she hides in her room and is afraid to look a man in the face. No one cries she leaves her home-Sudden as clouds when the rain stops. She bows her head and composes her face, Her teeth are pressed on her red lips: She bows and kneels countless times. She must humble herself even to the servants.”  
500AD Mazdakian revolt, Iranian peasants rose against the priests and nobles, seizing land and cattle and transforming their villages into communal villages  
The Babylonian Talmud (500 AD) notes the human tendency toward projection and warns against it: “Do not taint your neighbour with the bleach you yourself drink.”[7]  
622 The Constitution of Medina  
1215 The Magna Carta, 29 No freeman is to be taken or imprisoned or diseised of his free tenement or of his liberties or free customs, or outlawed or exiled or in any way ruined, nor will we go against such a man or send against him save by lawful judgement of his peers or by the law of the land. No-one will we sell or deny of delay right or justice. (\*Establishing the Right to Due Process)

1620 The New Organon, or True Directions Concerning the Interpretation of Nature  
1632 Dialogue Concerning the Two Chief World Systems  
1677 Discourse on the Method of Rightly Conducting One's Reason and Seeking Truth in Science, “Good sense is the best shared-out thing in the world; for everyone thinks he has a good supply of it that he doesn't want more, even if he is extremely hard to please about other things. Since it's not likely that everyone will be so wise, it is evidence that the power of judging well and of telling the true from the false, – which is what we properly call ‘good sense’ or ‘reason’ – is naturally equal in all men; thus it is also evidence that our opinions differ not because some of us are more reasonable than others, but solely because we take our thoughts along different paths and don't attend to the same things.”  
1644 Principles of Philosophy  
1687 Mathematical Principles of Natural Philosophy, Principia Newton's Laws of Motion and Universal Gravitation, “First Law: In an inertial frame of reference, an object either remains at rest or continues to move at a constant velocity, unless acted upon by a force. Second law: In an inertial reference frame, the vector sum of the forces F on an object is equal to the mass of that object multiplied by the acceleration a of the object: F = ma. Third law: When one body exerts a force on a second body, the second body simultaneously exerts a force equal in magnitude and opposite in direction on

1748 The Spirit of the Laws, Separation of Powers, civil liberties, and the end of slavery  
1754 Discourse on the Origin and Basis of Inequality Among Men, Private Property as the original source and basis of all inequality  
1760 1840 Industrial Revolution  
1762 The Social Contract, "Let us then admit that force does not create right, and that we are obliged to obey only legitimate powers"  
1776 Declaration of Independence, "We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness-- That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed-- That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such terms, and to such principles as they shall think most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing the same object, evinces a design to reduce us under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security."

1781 (discover in 'google docs' compilation)  
1789 Constitution of the United States of America, "We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquillity, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, Thine do hereby declare the existing Constitution of the United States having at the time of their adoption the Constitution, expanded to include the reconstruction or abuse of its powers, that further declaration and restrictive clauses should be added: AMENDMENT I Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances. AMENDMENT II A wellregulated Militia, being necessary to the security of the free State, the right of the people to keep and bear Arms, shall not be infringed. AMENDMENT III No Soldier shall, in time of peace be quartered in any house, without the consent of the Owner, nor in time of war, but in a manner to be prescribed by law. AMENDMENT IV The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, except upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized. AMENDMENT V No person shall be held to answer for a capital or otherwise infamous crime, unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or the Militia, when in actual service in time of War or public danger; nor shall any person be subject twice for the same offence to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation. AMENDMENT VI The right to a speedy and public trial by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the Assistance of Counsel for his defence. AMENDMENT VII Excessive bail shall not be required, nor excessive fines be imposed, nor cruel and unusual punishments inflicted. AMENDMENT VIII Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction. (\*\*Denounced by Declaration Universal human rights)

1916 "Collective Unconscious"  
1912/1920 Death Drive, Death Anxiety/Thanatophobia  
1917 A Theology for the Social Gospel, "Instead of being an aid in the development of the social gospel systematic theology had been a real cry. When a minister speaks to his people about child labor or the exploitation of the lowly by the strong; when he insists on adequate food, education, recreation, and opportunity for all, there is response. People are moved by plain human feeling and by the instinctive conviction which they have learned from Jesus Christ. But at once there are doubting and dissenting voices. We are told that the environment has no saving power; regeneration is what men need; we can not have a regenerate society without regenerate individuals; we do not live for this world but for the life to come; it is not the function of the church to deal with economic questions; any effort to change the social order before the coming of the Lord is foredoomed to failure. These are the chief objections to the social gospel for all these things are questions issued by traditional church teaching. These half-truths are the proper product of a halfway system of theology in which there is no room for social redemption. Thus the church is halting between two voices that call it. On one side is the voice of the living Christ among living men today; on the other side is the voice of past ages embodied in theology. Who will say that the authority of this voice has never confused or Christian judgement and paralyzed our determination to establish God's kingdom on Earth?"

1923, History of Class Consciousness, "commodity fetishism, which Lukacs completed with his concept of reification: alienation is what follows the workers' estrangement from the world following the new life acquired by the product of his work ("reflecting the conclusion of the master slave dialectic by Hegel")

defined itself against any onslaught from without. This ultimately it is the individual who is the unit.” In this structure composed of innumerable villages there will be ever widening, never ascending circles. Life will not be a pyramid with the apex sustained by the bottom. But it will be the individual always ready to perish for the village, the latter ready to perish for the village, sharing the majesty of the oceanic circle of which they are integral units.”

1948 Declaration of Universal Human Rights, “Whereas disregard and contempt for human rights have resulted in barbarous acts which have outraged the conscience of mankind, and whereas recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family is the foundation of freedom, justice and peace in the world, and whereas a common understanding of these rights and freedoms is of the greatest importance for the full realisation of this pledge every individual and every organ of society, keeping this Declaration constantly in mind, shall strive by teaching and education to promote respect for these rights and freedoms and by progressive measures, national and international, to secure their universal and effective recognition and observance. Article 1 All human beings are born free and equal in dignity and rights. They are endowed with reason and conscience and should act towards one another in a spirit of brotherhood. Article 2 Everyone has the right to freedom from slavery, slavery and the slave trade shall be prohibited in all their forms. Article 5 No one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment. Article 16 3. The family is the natural and fundamental group unit of society and is entitled to protection by society and the State. Article 22 Everyone, as a member of society, has the right to social security and is entitled to realisation ... for his dignity and the free development of his personality. Article 23 1. Everyone has the right to work, to free choice of employment, to just and favourable conditions of work and to protection against unemployment. 2. Everyone, without any discrimination, has the right to equal pay for equal work. 3. Everyone who works has the right to a just and favourable living adequate for the health and well-being of himself and of his family, including food, clothing, housing and medical care and necessary social services, and the right to security in the event of unemployment, sickness, disability, widowhood, old age or other lack of livelihood in circumstances beyond his control. 2. Motherhood and childhood are entitled to special care and assistance. All children, whether born in or out of wedlock, shall enjoy the same protection. Article 26 1. Education shall be directed to the full development of the human personality and to the strengthening of respect for human rights and fundamental freedoms. It shall promote understanding, tolerance and friendship among all nations, racial and religious groups, and shall further the activities of the United Nations for the maintenance of peace. Article 27 1. Everyone has the right freely to participate in the cultural life of the community and to enjoy the benefits of scientific advancement and its benefits. Article 29 1. Everyone has duties to the community in which alone the free and full development of his personality is possible.”

1957 Schedules of Reinforcement

1960 The Capitalist Manifesto: Freudism requires an economic system which supports the political ideals of liberty and equality for all. Marx cannot exercise freedom in the political sphere when they are deprived of it in the economic sphere. John Adams and Alexander Hamilton observed that a man who is dependent for his subsistence on the arbitrary will of another man is not economically free and so should not be admitted to citizenship because he cannot use the political liberty which belongs to that status. (1) economic liberty, i.e., the abolition of all economic slavery, servitude, or dependence; (2) political liberty, i.e., the abolition of all economic status whatsoever, of the right of one person to appropriate the labor of another. Two main reasons against communism: 1. "Dependent for their subsistence on the arbitrary will of the state" relying on bureaucrats is just as unfree as private owners. 2. "Equal liability of all to labor" impedes rather than promotes economic freedom. My analysis: capitalists do not trust the state and Communists do not trust private property. The solution is to understand both of these concerns as being one in the same.

1969 Application of Information Theory to Psychology

1959, The Evolution of Culture, Leslie White "Originally, i.e., with the advent of civil society, the church and the state were one, as Herbert Spencer actually observed many years ago [1896]...". In the ancient Persia, the head of the state and the head of the church were brothers, or uncle and nephew, or brother-in-law, or even identical persons. They were also priests, and the king was a priest, and the priest was a king, and the king was the pariah had no authority to delegatize the worship of the gods to the priests, who acquired thereby so much autonomy as virtually to constitute a church structurally distinct from the state.... In the early urban cultures of Mesopotamia, "priestly and secular functions no doubt rested in one and the same person." [Jastrow, 1915] In ancient Sumer, "church and state were so bound together that those exercising authority formed a theocracy, functioning on the basis of religious dogma." [Jastrow, 1915] [1841] The kings of Assyria and Babylonia were priests, and they "retain their sacerdotal functions throughout all periods of the kingdom." [Jastrow, 1915] "Church and state were one in India." [Hocart, 1950]. In Greece during the Iron Age the king was also a priest. Many pagan ruling families of Scandinavia received their descent from Nordic deities, even as the modern Japanese trace their Emperor to divine ancestry. Caesar was Pontifex maximus as well as emperor in imperial Rome; Augustus likewise served as the head of the state religion.... "The military and political power of the Roman Empire was vested in the hands of the emperor, who was at the same time pontifex maximus, the highest priest to be employed in that office. So it was that the priests taught the masses, and validated these teachings with the wonders and mysteries of religion, that they should accept, and even defend the established order. For the Egyptians, the universe was a moral order established by the sun god, Re, and their social ideal involved "a full acceptance of class status, the inferiority of labor, and poverty as the normal condition of common men; these, indeed, were aspects of piety." [Tarn, 1947] Confucianism taught men to be virtuous to contend with their lot and station in life. The teaching of Confucius "devoted its whole attention to making people recognize their betters with distinction," according to Ku Chia-chen, "and that is certainly a most advantageous theory to an autocratic despot." More recently, the Roman Catholic Church has recognized the utility and function of religion as means of

commerce in wire and radio communication, there is hereby created a commission to be known as the 'Federal Communications Commission', which shall be constituted as hereinafter provided, and which shall execute and enforce the provisions of this Act."

1935 – Roerich Pact The most important idea of the Roerich Pact is the legal recognition that the defense of cultural objects is more important than the use or destruction of that culture for military purposes, and the protection of culture always has precedence over any military necessity.

1936 Defense Mechanisms

1941 Atlantic Charter: "First, their countries seek no aggrandizement, territorial or other; Second, they desire to see no territorial changes that do not accord with the freely expressed wishes of the peoples concerned; Third, they respect the right of all peoples to choose the form of government under which they will live; and they wish to see sovereign rights and self-government restored to those who have been forcibly deprived of them; Fifth, they desire to bring about the fullest collaboration between all nations in the economic field with the object of securing, for all, improved labor standards, economic advancement and social security; Sixth, after the final destruction of Nazi tyranny, they hope to see established a peace which will afford to all nations the means of dwelling in safety within their own boundaries, and which will afford assurance that all the men in all the lands may live out their lives in freedom from fear and want; Seventh, such a peace should enable all men to traverse the high seas and oceans without hindrance; Eighth, they believe that all of the nations of the world, for realistic as well as spiritual reasons must come to the abandonment of the use of force."

1943 A theory of Human Motivation (Maslow's Hierarchy of Needs)

1945 Charter of the United Nations. "WE THE PEOPLES OF THE UNITED NATIONS DETERMINED to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind, and to reaffirm faith in fundamental human rights, in the dignity and worth of the human person, in the equal rights of men and women, and in the good neighbourliness which should prevail between all peoples; to establish a system of collective security, and to promote economic and social progress and better standards of life in larger freedom, AND FOR THESE ENDS to practice tolerance and live together in peace with one another as good neighbours, and to unite our strength to maintain international peace and security, and to ensure, by the acceptance of principles and the institution of methods, that armed forces shall be employed only in the defence of free peoples against aggression, and to employ international machinery for the promotion of the economic and social advancement of all peoples, WE HAVE AGREED upon the following Purposes and Principles of the United Nations:

1. To maintain international peace and security, and to ensure by collective action the effective implementation of provisions in this Charter for the maintenance of peace and security;

2. To develop friendly relations among nations based on respect for the principle of equal rights and self-determination of peoples, 3. To achieve international co-operation in solving international problems of an economic, social, cultural, or humanitarian character, and in promoting and encouraging respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language, or religion; 4. To be a center for harmonizing the actions of nations in the attainment of these common ends;

5. All Members shall fulfil the obligations assumed by them in accordance with the following Principles. 1. The Organization is based on the principle of the sovereign equality of all its Members. 2. All Members, in order to ensure to all of them the rights and benefits resulting from membership, shall fulfil in good faith the obligations assumed by them in accordance with the present Charter. 3. All Members shall settle their international disputes by peaceful means in such a manner that international peace and security, and justice, are not endangered. 4. All Members shall refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any state, or in any manner inconsistent with the provisions of this Charter. 5. All Members shall refrain from the threat or use of force against the continuance of which is likely to endanger the maintenance of international peace and security, shall, first of all, seek a solution by negotiation, enquiry, mediation, conciliation, arbitration, judicial settlement, re-sort to regional agencies or arrangements, or other peaceful means of their own choice. 2. The Security Council shall, when it deems necessary, call upon the parties to settle their dispute by such means. CHAPTER VII ACTION WITH RESPECT TO THREATS TO THE PEACE, BREACHES OF THE PEACE, AND ACTS OF AGGRESSION Article 39 The Security Council shall determine the existence of any threat to the peace, breach of the peace, or act of aggression, and shall recommend what action should be taken in accordance with Articles 41 and 42, to maintain or restore international peace and security."

1945 Constitution of the United Nations Educational, Scientific and Cultural Organization, "The Governments of the States Parties to this Constitution on behalf of their peoples declare: That since wars began in the minds of men, it is in the minds of men that the defenses of peace must be constructed. That ignorance of each other's ways and customs has been a common cause, throughout the history of mankind, of that suspicion and mistrust between the peoples and the nations through which wars have arisen; That since the only real triumph of war is the triumph of peace, a war was made possible by the denial of the democratic principles of the dignity, equality and mutual respect of men, and by the propagation, in their place, through ignorance and prejudice, of the doctrine of the inequality of men and races; That the wide diffusion of culture, and the education of humanity for justice and liberty and peace are indispensable to the dignity of man and constitute a sacred duty which all the nations must fulfill in a spirit of mutual co-operation and good will; That in order to promote the progress of science, culture and peace, it is essential that education should be directed to the creation of the united and harmonious world which alone could secure the unanimous, lasting and sincere support of the peoples of the world, and that the peace must therefore be founded, if it is not to fail, upon the intellectual and moral solidarity of mankind. For these reasons, the States Parties to this Constitution, believing in full and equal opportunities for education for all, in the unrestricted pursuit of objective truth, and in the free exchange of ideas and knowledge, are agreed and determined to develop and to increase the means of communication between their peoples and to employ these means for the purposes of mutual understanding and a truer and more fruitful knowledge of each other's ways and customs; and, in order to achieve these purposes, to promote the progress of science, culture and peace by promoting collaboration among the nations through education, science and culture in order to further universal respect for justice, for the rule of law and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language or religion, by the Charter of the United Nations, 2. To realize this purpose the Organization will:

- (a) Collaborate in the work of advancing the mutual knowledge and friendship of peoples, the political stability and co-operation of nations, the peace and security of the world, and the economic and social advancement of all mankind;
- (b) Promote the free flow of ideas by word and image;
- (c) Give fresh impetus to popular education and to the spread of culture; By collaborating with Members, at their request, in the development of educational activities; By instituting collaboration among the nations to advance the ideal of equality of educational opportunity without regard to race, sex or any distinctions, economic or social; By suggesting educational methods best suited to prepare the children of the world for the responsibilities of freedom; (d) Maintain, increase and diffuse knowledge; By assuring the conservation and protection of the cultural and scientific monuments, works, works of art and monuments of history and science, and recommending to the nations concerned the necessary international conventions;"

1946 Man's Search for Meaning. "Freedom, however, is not the last word. Freedom is only part of the story and half of the truth. Freedom is but the negative aspect of the whole phenomenon whose positive aspect is responsibility. In fact, freedom is in danger of degenerating into mere arbitrariness unless it is loaded with the sense of responsibility. It is not freedom that is the enemy of responsibility, but the lack of it. Responsibility on the West Coast" Frank identifies three psychological reactions experienced by all inmates to one degree or another: (1) shock during the initial admission phase to the camp, (2) apathy after becoming accustomed to camp existence, in which the inmate values only that which helps himself and his friends survive, and (3) (a) reactions of depersonalization, (b) moral degradation, (c) bitterness, and disillusionment if he survives and is liberated. As a result of these reactions, the inmate is left with a sense of meaninglessness, a feeling of being a victim of an unending nightmare. <sup>55</sup> "Grief and belief formation; cognitive dissonance; the creative mind; fantasizing; fantasizing solution to each waking problem."

1947 Gandhi, *India of My Dreams* "the unfinished revolution," he described a highly decentralized government of limited peers, "where every village will be a republic or panchayat having full powers." He described a self-sufficient society that could maintain its moral priorities and provide a rich enough political and economic life to resist penetration by malignant outside forces. "It follows therefore, that every village has to be self-sustained and capable of managing its affairs even to the extent of defending itself against the whole world. It will be trained and prepared to perish in the attempt to

## Communism must be defeated, not contained

1961 Shock Experiment, Milgram

1961 Farewell Address to the Nation, Dwight D Eisenhower, "A vital element in keeping the peace is our military establishment. Our arms must be mighty, ready for instant action, so that no potential aggressor may be tempted to risk his own destruction... This conjunction of an immense military establishment and a large nuclear arsenal calls for the gravest examination and reflection. In the first place, it is essential to recognize that the basic purpose of our military establishment is to defend the Nation against external threats. It is not to be used against any fellow citizen, every citizen, every office of the federal government. We recognize the imperative need for this development. Yet we must not fail to comprehend its grave implications. Our toil, resources and livelihood are all involved; so is the very structure of our society. In the councils of government, we must guard against the acquisition of unwarranted influence, whether sought or unsought, by the military-industrial complex. The potential for the disastrous rise of misplaced power exists and will persist. We must never let the weight of this combination endanger our liberties or democratic processes. We should take nothing for granted. Only an alert and knowledgeable citizenry can compel the proper meshing of the huge industrial and military machinery of defense

1962 Port Huron Statement The awe inspired by the pervasiveness of racism in American life is only matched by the marvel of its historical roots in colonial America. The national heritage of racial discrimination via slavery has been a part of America since Christopher Columbus's advent on the new continent. . . .

"Our work is guided by the sense that we may be the last generation in the experiment with living. But we are a minority—the vast majority of our people regard the temporary equilibriums of our society and world as eternally-functional parts." "We regard man as infinitely precious and possessed of infinite potentialities. We believe that the future of the race lies in the hands of men, and that the future of each individual lies in his own hands. There are various dreams: the dream of the older left were perverted by Stalinism and never recreated; the horrors of the twentieth century, symbolized in the gas-ovens and concentration camps and atom bombs, have blasted hopefulness. To be idealistic is to be considered apocalyptic, deluded." "The apathy here, first and foremost, is the result of the failure of the American dream. It is the failure of the American dream because it is the failure of the American political system—the actual structural separation of people from power, from relevant knowledge, from pinnacles of decision-making. . . . The American political system is not the democratic model of which its glorifiers speak. In actuality it frustrates democracy by confining the individual citizen.

1963 I have a Dream "...I say to you today, my friends, though, even though we face the difficulties of today and tomorrow, I still have a dream. It is a dream deeply rooted in the American dream. I have a dream that one day this nation will rise up, live out the true meaning of its creed: "'We hold these truths to be self-evident, that all men are created equal...'"

1986 Seville Statement - IT IS SCIENTIFICALLY INCORRECT to say that we have inherited a tendency to make war from our animal

ancestors. Although fighting occurs widely throughout animal species, only a few cases of destructive intra-species fighting between organized groups have ever been reported among naturally living species, and none of these involve the use of tools designed to be weapons. Normal predatory feeding upon

It is **NOT** SCIENTIFICALLY CORRECT to say that war or any other violent behaviour is generally programmed into our human genes. It is not. Genes are involved, but they are not the only factors. They are in interaction with the environment, with social and cultural factors, with social and environmental conditions. While individuals vary in their predispositions to be affected by their experience, it is the interaction between their genetic endowment and conditions of nurture that determines their personalities. Except for rare pathologies, the genes do not produce individuals necessarily predisposed to violence. It is **NOT** SCIENTIFICALLY CORRECT to say that in the course of human evolution there has been a selection for aggressive behaviour more than for other kinds of behaviour. In all well-studied species, status within the group is achieved by the ability to co-operate and to fulfill social functions more than by the ability to fight. In humans, the ability to co-operate is simply a major part of the package of the social skills that are necessary for physical power, although it does involve aggressive behaviours. Where genetic selection for aggressive behaviour has been artificially instituted in humans, it has rapidly succeeded in producing hyper-aggressive individuals; this indicates that aggression was not maximally selected against under natural conditions.

When such experimentally-created hyper-aggressive animals are present in a social group, they either disrupt its social structure or are driven out. Violence is neither in our evolutionary legacy nor in our genes. IT IS SCIENTIFICALLY INCORRECT to say that humans have a "violent brain." While we do have some biological predispositions toward aggression, there are many other factors that influence our behavior. The most important of these are higher neural processes filter such stimuli before they can be acted upon. How we act is shaped by how we have been conditioned and socialized. There is nothing in our neurophysiology that compels us to react violently. IT IS SCIENTIFICALLY INCORRECT to say that war is caused by "instincts" or any other kind of innate drive. War is a complex phenomenon that arises from a variety of factors, including cultural, political, economic, and psychological "instincts," to the primacy of cognitive factors. Modern war involves institutional use of personal characteristics such as obedience, suggestibility, and idealism, social skills such as language, and rational considerations such as cost-calculation, planning, and information processing. The technology of modern warfare has made it possible for a small number of individuals to control the actions of millions of people.

In general population. As a result of this exaggeration, such traits are often mistaken to be the causes rather than the consequences of the process. We conclude that biology does not condemn humanity to war, and that humanity can be freed from the bondage of biological pessimism and empowered with the tools of reason and science. Yearning for peace is a natural part of being human. Peace is a goal that all humans share, regardless of their individual, institutional and collective, they also rest upon the consciousness of individual participants for whom pessimism and optimism are crucial factors ("affirmation") or just power of belief/desire). Just as war was begun in the minds of men, peace also begins in our minds. The same species who invents

1987 The Myth that War is Intrinsic to Human Nature Discourages Peace Activists  
1989 Convention on Rights of Children Recalling that, in the Universal Declaration of Human Rights, the United Nations has proclaimed that childhood is entitled to special care and assistance. Convinced that the family, as the fundamental group of society and the natural environment for the growth and well-being of all its members and particularly children, should be afforded the necessary protection and assistance so that it can fully assume its responsibilities within the community. Recognizing that the child, for the full and harmonious development of his or her personality, should grow up in a family environment, in an atmosphere of happiness, love and understanding. Bearing in mind that, as indicated in the Declaration of the Rights of the

Child, "the child, by reason of his physical and mental immaturity, needs special safeguards and care, including appropriate legal protection, before as well as after birth", Article 14.1, States Parties shall respect the right of the child to freedom of thought, conscience and religion. Article 24.1, States Parties recognize the right of the child to the enjoyment of the highest attainable standard of health and to facilities for the treatment of illness and rehabilitation of health. States Parties shall strive to ensure that no child is deprived of his or her right of access to such health care services. 2. (c) To combat disease and malnutrition, including within the framework of primary health care, through, inter alia, the application of readily available technology and through the provision of adequate nutritious foods and clean drinking-water, taking into consideration the dangers and risks of environmental pollution; (d) To ensure appropriate pre-natal and post-natal health care for mothers; (e) To ensure that all segments of society, in particular parents and children, are informed, have access to education and are supported in the use of basic knowledge of child health and nutrition, the advantages of breastfeeding, hygiene and environmental sanitation and the prevention of accidents; Article 27.1. States Parties recognize the right of every child to a standard of living adequate for the child's physical, mental, spiritual, moral and social development. 3. States Parties, in accordance with national conditions and within their means, shall take appropriate measures to assist parents and others responsible for the child to implement this right and shall in case of need provide material assistance and support programmes, particularly with regard to nutrition, clothing and housing. Article 29.1. States Parties agree that the education of the child shall be directed to: (a) The development of the child's personality, talents and mental and physical abilities to their fullest potential; (b) The development of respect for human rights and fundamental freedoms, and for the principles enshrined in the Charter of the United Nations; (c) The development of respect for the child's parents, his or her own cultural identity, language and values, for the national values of the country in which the child is living, the country from which he or she may originate, and for civilizations emdiffernt from his or her own; (d) The preparation of the child for responsible life in a free society, in the spirit of understanding, peace, tolerance, equality of sexes, and friendship among all peoples, ethnic, national and religious groups and persons of indigenous origin; (e) The development of respect for the natural environment. Article 33 States Parties shall take all appropriate measures, including legislative, administrative, social and educational measures, to protect children from the illicit use of narcotic drugs and psychotropic substances as defined in the relevant international treaties, and to prevent the use of children in the illicit production and trafficking of such substances. Article 34 States Parties undertake to protect the child from all forms of sexual exploitation and sexual abuse. For these purposes, States Parties shall in particular take all appropriate national, bilateral and multilateral measures to prevent: (a) The inducement or coercion of a child to engage in any unlawful sexual activity; (b) The exploitative use of children in prostitution or other unlawful sexual practices; (c) The exploitative use of children in pornographic performances and materials. Article 35 States Parties shall take all appropriate national, bilateral and multilateral measures to prevent the abduction of, the sale of or traffic in children for any purpose or in any form.

1995 "The Hard Problem of Consciousness", facing up to the Problem of Consciousness, Chalmers, "It is undeniable that some organisms are subjects of experience. But the question of how it is that these systems are subject of experience is that which separates them from other systems engaged in visual and auditory information-processing, we have visual or auditory experience: the quality of deep blue, the sensation of middle C? How can we explain why there is something it is like to entertain a mental image, or to experience an emotion? It is widely agreed that experience arises from a physical basis, but we have no good explanation of why and how it so arises. Why should physical processing give rise to a rich inner life at all? It seems objectively unreasonable that it should, and yet it does." In the same paper, he also wrote "The really hard problem of consciousness is the problem of experience. When we think and perceive there is a whirl of information processing, but there is also a subjective aspect."

Other formulations of the "hard problem" include:  
"How is it that some organisms are subjects of experience?"  
"Why does awareness of sensory information exist at all?"  
"Why do qualia exist?"  
"Why aren't we philosophical zombies?"

1999 Declaration on a Culture of Peace Recalling also the Constitution of the United Nations Educational, Scientific and Cultural Organization, which states that "since the minds of men, it is in the minds of men, it is in the minds of men that the defence of peace must be constructed". Recognizing that peace not only is the absence of conflict, but also requires a positive, dynamic participatory process where dialogue is encouraged and conflicts are solved in a spirit of mutual understanding and cooperation, Expressing deep concern about the persistence and proliferation of violence and conflict in various parts of the world, Article 1 A culture of peace is a set of values, attitudes, traditions and modes of behaviour and ways of life based on: (a) The respect for life, ending of violence and promotion and practice of non-violence through education, dialogue and cooperation; (b) Full respect for the principles of sovereignty, territorial integrity and political independence of States and non-intervention in matters which are essentially within the domestic jurisdiction of any State, in accordance with the Charter of the United Nations and international law; (c) Full respect for and promotion of all human rights and fundamental freedoms; (d) Commitment to peaceful settlement of conflicts; (e) Efforts to meet the developmental and environmental needs of present and future generations; (f) Respect for and promotion of the right to development; (g) Respect for and promotion of equal rights and opportunities for women and men; (h) Respect for and promotion of the right of everyone to freedom of expression, opinion and information; (i) Adherence to the principles of freedom, justice, democracy, tolerance, solidarity, cooperation, pluralism, cultural diversity, dialogue and understanding at all levels of society and among nations; and fostered by an enabling national and international environment conducive to peace. Article 3 The fuller development of a culture of peace is integrally linked to: (a) Promoting democracy, development and universal respect for and observance of all human rights and fundamental freedoms; (d) Enabling people at all levels to develop skills of dialogue, negotiation, consensus-building and peaceful resolution of differences; Eradicating poverty and illiteracy and reducing inequalities within and among nations; (g) Promoting sustainable economic and social development; (h) Eliminating all forms of discrimination against women through their empowerment and equal representation at all levels of decision-making; (i) Ensuring respect for and promotion and protection of the rights of children;(j) Ensuring free flow of information at all levels and enhancing access thereto; (k) Increasing transparency and accountability in government; (l) Eliminating all forms of racism, racial discrimination, xenophobia (\*\*\*) One who fears that which is unlike himself, or who fears people who are different from oneself, especially foreigners\*\*\*\*criminals) and related intolerance; (n) Realizing fully the right of all peoples, including those living under colonial or other forms of alien domination or foreign occupation, to self-determination enshrined in the Charter of the United Nations and embodied in the International Covenants on Human Rights,2 Article 4 Education at all levels is one of the principal means to build a culture of

peace. In this context, human rights education is of particular importance. Article 5 Governments have an essential role in promoting and strengthening a culture of peace. Article 6 Civil society needs to be fully engaged in fuller development of a culture of peace. Article 7 The educative and informative role of the media contributes to the promotion of a culture of peace. Article 8 A key role in the promotion of a culture of peace belongs to parents, teachers, politicians, journalists, religious bodies and groups, intellectuals, those engaged in scientific, philosophical and creative and artistic activities, health and humanitarian workers, social workers, managers of various levels as well as to non-governmental organizations.

1999 Program of Action on a Culture of Peace 7. A culture of peace could be promoted through sharing of information among actors on their initiatives in this regard. 10. Actions to promote sustainable economic and social development: (a) Undertake comprehensive actions on the basis of appropriate strategies and agreed targets to eradicate poverty through national and international efforts, including through international cooperation; (b) Strengthen the national capacity for implementation of policies and programmes designed to reduce economic and social inequalities within nations through, inter alia, international cooperation; (d) Reinforce actions at all levels to implement national strategies for sustainable food security, including the development of actions to mobilize and optimize the allocation and utilization of resources from all sources, including through international cooperation, such as resources coming from debt relief; (e) Incorporate capacity-building in development strategies and projects to ensure environmental sustainability, including preservation and regeneration of the natural resource base; (f) Remove obstacles to the realization of the right of peoples to self-determination, in particular of peoples living under colonial or other forms of alien domination or foreign occupation, which adversely affect their social and economic development; 13. Actions to foster democratic participation: (c) Combating of terrorism, organized crime, corruption as well as production, trafficking and consumption of illicit drugs and money laundering, as they undermine democracies and impede the fuller development of a culture of peace. 14. Actions to advance understanding, tolerance and solidarity: (c) Study further the local or indigenous practices and traditions of dispute settlement and promotion of tolerance with the objective of learning from them; (d) Support actions that foster understanding, tolerance and solidarity through society, in particular with vulnerable groups; 15. Actions to support participatory communication and the free flow of information and knowledge: (a) Support the important role of the media in the promotion of a culture of peace; (b) Ensure freedom of the press and freedom of information and communication; (c) Make effective use of the media for advocacy and dissemination of information on a culture of peace involving, as appropriate, the United Nations and relevant regional, national and local mechanisms; (d) Promote mass communication that enables communities to express their needs and participate in decision-making; (e) Take measures to address the issue of violence in the media, including new communication technologies, inter alia, the Internet; 16. Actions to promote international peace and security: (b) Refrain from military, political, economic or any other form of coercion, not in accordance with international law and the Charter, aimed against the political independence or territorial integrity of any State; (\*\*\*)Trump Ukraine...) (e) Take measures to eliminate illicit production and traffic of small arms and light weapons; (\*\*\*)article: risky business)

2002 Patent Norms and the Role of Public Intellectual Property in a Technology Suppression  
2007 Declaration on the Rights of Indigenous People Affirming that indigenous peoples are equal to all other peoples, while recognizing the right of all peoples to be different, to consider themselves different, and to be respected as such, Affirming also that all peoples contribute to the diversity and richness of civilizations and cultures, which constitute the common heritage of hu-mankind, Affirming further that all doctrines, policies and practices based on or advocating superiority of peoples or individuals on the basis of national origin or racial, religious, ethnic or cultural differences are racist, scientifically false, legally invalid, morally condemnable and socially unjust. Article 8.1. Indigenous peoples and individuals have the right not to be subjected to forced assimilation or destruction of their culture. 2. States shall provide effective mechanisms for prevention of, and redress for:(a) Any action which has the aim or effect of depriving them of their integrity as distinct peoples, or of their cultural values or ethnic identities;(b) Any action which has the aim or effect of possessing them of their lands, territories or resources; (\*\*\*)lampey, salmon, camas, drought, pollution etc) Article 10 Indigenous peoples shall not be forcibly removed from their lands or territories. No relocation shall take place without the free, prior and informed consent of the indigenous peoples concerned and after agreement on just and fair compensation and, where possible, with the option of return. Article 11.1. Indigenous peoples have the right to practise and revitalize their cultural traditions and cus-toms. This includes the right to maintain, protect and develop the past, present and future manifestations of their cultures, such as archaeological and historical sites, artefacts, de-signs, ceremonies, technologies and visual and performing arts and literature. 2. States shall provide redress through effective mechanisms which may include restitution, developed in conjunction with indigenous peoples, with respect to their cultural, intellectual, religious and spiritual property taken with-out their free, prior and informed consent or in violation of their laws, traditions and customs. Article 26.1 Indigenous peoples have the right to the lands, territories and resources which they have traditionally owned, occupied or otherwise used or acquired.2. Indigenous peoples have the right to own, use, develop and control the lands, territories and resources that they possess by reason of traditional ownership or other traditional occupation or use, as well as those which they have otherwise acquired.3. States shall give legal recognition and protection to these lands, territories and resources. Such recognition shall be conducted with due respect to the customs, traditions and land tenure systems of the indigenous peoples concerned. Article 28.1. Indigenous peoples have the right to redress, by means that can include restitution or, when this is not possible, just, fair and equitable compensation, for the lands, territories and re-sources which they have traditionally owned or otherwise occupied or used, and which have been confiscated, taken, occupied, used or damaged without their free, prior and in-formed consent. Article 29.1. Indigenous peoples have the right to the conservation and protection of the environment and the productive capacity of their lands or territories or resources. States shall establish and implement assistance programmes for indigenous peoples for such conservation and protection, without discrimination. Article 32.1. Indigenous peoples have the right to determine and develop priorities and strategies for the development or use of their lands or territories or other resources. 2. States shall consult and cooperate in good faith with the indigenous peoples concerned through their own representative institutions in order to obtain their free and informed consent prior to the approval of any project affecting their lands or territories or other resources, particularly in connection with the development, utilization or exploitation of mineral, water or other resources. 3. States shall provide effective mechanisms for just and fair redress for any such activities, and appropriate measures shall be taken to mitigate adverse environmental, economic, social, cultural or spiritual impact.

2008 The History of the Culture of War, Adams, updates the 8 aspects of a culture of war identified in the original UNESCO document on a culture of peace to 15.1. armies and armaments 2. neocolonialism 3. the internal culture of war and economies based on exploitation (capitalist exploitation of workers and of the environment, as well as exploitation and destruction of the environment) 4. means to deter worker revolts and political dissidents including internal use of military power, prisons and executions 5. the military-industrial complex 6. the drugs-for arms trade 7. authoritarian rule associated with military leadership 8. control of information through secrecy and propaganda 9. identification of an "enemy" 10. education for a culture of war 11. male domination 12. religious institutions that support the government and military 13. artistic and literary glorification of military conquest 14. nationalism 15. racism, both institutional and attitudinal

2010 Universal Declaration on Rights of Mother Earth We, the peoples and nations of Earth: considering that we are all part of Mother Earth, an indivisible, living community of interrelated and interdependent beings with a common destiny; gratefully acknowledging that Mother Earth is the source of life, nourishment and learning and provides everything we need to live well; recognizing that the capitalist system and all forms of depredation, exploitation, abuse and contamination have caused great destruction, degradation and disruption of Mother Earth, putting life as we know it today at risk through phenomena such as climate change; convinced that in an interdependent living community it is not possible to recognize the rights of only human beings without causing an imbalance within Mother Earth; affirming that to guarantee human rights it is necessary to recognize and defend the rights of Mother Earth and all beings in her and that there are existing cultures, practices and laws that do so; conscious of the urgency of taking decisive, collective action to transform structures and systems that cause climate change and other threats to Mother Earth; proclaim this Universal Declaration of the Rights of Mother Earth, and call on the General Assembly of the United Nation to adopt it, as a common standard of achievement for all peoples and all nations of

the world, and to the end that every individual and institution takes responsibility for promoting through teaching, education, and consciousness raising, respect for the rights recognized in this Declaration and ensure through prompt and progressive measures and mechanisms, national and international, their universal and effective recognition and observance among all peoples and States in the world. Article 1. Mother Earth (1) Mother Earth is a living being. (2) Mother Earth is a unique, indivisible, self-regulating community of interrelated beings that sustains, contains and reproduces all beings. (3) Each being is defined by its relationships as an integral part of Mother Earth. (4) The inherent rights of Mother Earth are inalienable in that they arise from the same source as existence. (5) Mother Earth and all beings are entitled to all the inherent rights recognized in this Declaration without distinction of any kind, such as may be made between organic and inorganic beings, species, origin, use to human beings, or any other status. (6) Just as human beings have human rights, all other beings also have rights which are specific to their species or kind and appropriate for their role and function within the communities within which they exist. (7) The rights of each being are limited by the rights of other beings and any conflict between their rights must be resolved in a way that maintains the integrity, balance and health of Mother Earth. Article 2. Inherent Rights of Mother Earth (1) Mother Earth and all beings of which she is composed have the following inherent rights: (a) the right to life and to exist; (b)the right to be respected; (c) the right to continue their vital cycles and processes free from human disruptions; (d)the right to maintain its identity and integrity as a distinct, self-regulating and interrelated being; (e) the right to water as a source of life; (f) the right to clean air; (g)the right to integral health; (h) the right to be free from contamination, pollution and toxic or radioactive waste; (i) the right to not have its genetic structure modified or disrupted in a manner that threatens its integrity or vital and healthy functioning; (j) the right to full and prompt restoration of the rights recognized in this Declaration caused by human activities; (2) Each being has the right to a place and to play its role in Mother Earth for her harmonious functioning; (3) Every being has the right to wellbeing and to live free from torture or cruel treatment by human beings. Article 3. Obligations of human beings to Mother Earth (1) Every human being is responsible for respecting and living in harmony with Mother Earth. (2) Human beings, all States, and all public and private institutions must: (a) act in accordance with the rights and obligations recognized in this Declaration; (b)recognize and promote the full implementation and enforcement of the rights and obligations recognized in this Declaration; (c) promote and participate in learning, analysis, interpretation and communication about how to live in harmony with Mother Earth in accordance with this Declaration; (d) ensure that the pursuit of human wellbeing contributes to the wellbeing of Mother Earth, now and in the future; (e) establish and apply effective norms and laws for the defence, protection and conservation of the rights of Mother Earth; (f) respect, protect, conserve and where necessary, restore the integrity of the vital ecological cycles, processes and balances of Mother Earth; (g) guarantee that the damages caused by human violations of the inherent rights recognized in this Declaration are rectified and that those responsible are held accountable for restoring the integrity and health of Mother Earth; (h) empower human beings and institutions to defend the rights of Mother Earth and of all beings; (i) establish precautionary and restrictive measures to prevent human activities from causing species extinction, the destruction of ecosystems or the disruption of ecological cycles; (j) guarantee peace and eliminate nuclear, chemical and biological weapons; (k) promote and support practices of respect for Mother Earth and all beings, in accordance with their own cultures, traditions and customs; (l) promote economic systems that are in harmony with Mother Earth and in accordance with the rights recognized in this Declaration. Article 4. Definitions (1) The term "being" includes ecosystems, natural communities, species and all other natural entities which exist as part of Mother Earth. (2) Nothing in this Declaration restricts the recognition of other inherent rights of all beings or specified beings.

2013 Multinational Corporations' Economic and Human Rights Impacts on Developing Countries, Giuliani  
2015 University of Illinois released its study on government corruption  
2015 Terror Management Theory, "A basic psychological conflict results from having a self-preservation instinct whilst realizing that death is inevitable and to some extent unpredictable. This conflict produces terror, and the terror is then managed by embracing cultural values, or symbolic systems that act to provide life with enduring meaning and value."  
2016 Consciousness Declaration 1. We Are One with humanity and all life. Business and, all institutions of the human community are integral parts of a single reality — interrelated, interconnected and interdependent. 2. In line with this reality, the purpose of Business is to increase economic prosperity while contributing to a healthy environment and improving human wellbeing. 3. Business must go beyond sustainability and the philosophy of "do no harm" to restoring the self-renewing integrity of the Earth. 4. Business must operate with economic, social, and ecological transparency. 5. Business must behave as a positive and proactive member of the local and global communities in which it operates. 6. Business that sees, honors, and celebrates the essential interconnected nature of all human beings and all life maximizes human potential and helps create a world that works for all. 7. When aligned with Oneness, Business is the most powerful engine on Earth for creating prosperity and flourishing for all.
